since **1967**

the name of stainless steel bathroom products **evimetal**

Evimetal is a leading company in the construction products sector. Since 1967, it has been engaged in the manufacture and design of stainless molds. For the last fifteen years, Evimetal has been producing decorative and technical profiles, shower channels, drains, and substrates.

Evimetal has many advantages offered by a well-organized and qualified production force. An in-house design team who has won awards in both national and international competitions, along with a dedicated sales team and its references play a significant role in Evimetal' s success. The quality of our products is guaranteed through the use of certified, first-class grade 304 stainless steel.

Products conforming to BSCI-CE standards represent Evimetal' s sense of quality. This has been achieved with the assistance of state-of-the-art technology, an integrated production facility, and R&D studies conducted for production process and product functionality (ISO 9001-2008 Quality system certificate).

In 2021, Germany's innovative brand in the sector of shower drain systems and profiles and Evimetal, the brand which stands out with its characteristic of being both, the first manufacturer and sector leader in Turkey, joined forces.

Cuttable

Double Side Usage

CutLine is a product that has almost everything to meet the expectations of a decorative and functional shower channel. Thanks to its existing mono-block structure, the product can be used without the need for any additional parts, and it can meet different size demands on its own, thanks to its cuttable body and different cuttable cover options. Models produced as various dimensions can be selected, or they can be easily adapted to special size demands by cutting them up to 40 cm. Thanks to its compatibility with tiling, it is the only product that combines all these features. Special sloped body structure with its easily removable cover provides easy cleaning. Thanks to the flange manufactured with an integrated insulation membrane, it provides a guarantee of impermeability.
