2023

A FIRST IN THE WORLD **WALLFIX**

- Adjustable Cistern Height Installation by Italian system
- Easy Installation
- rimLess option
- Different cistern model alternatives
- Luxurious chrome pipe alternative
- Flush mechanism assembled

Bathroom pleasure without **bacteria**

Hygiene Extra is a special system that prevents bacteria formation by using silver ion technology. This system provides hygienic environment in residential and public areas by providing less bacteria formation on ceramic sanitaryware surfaces.

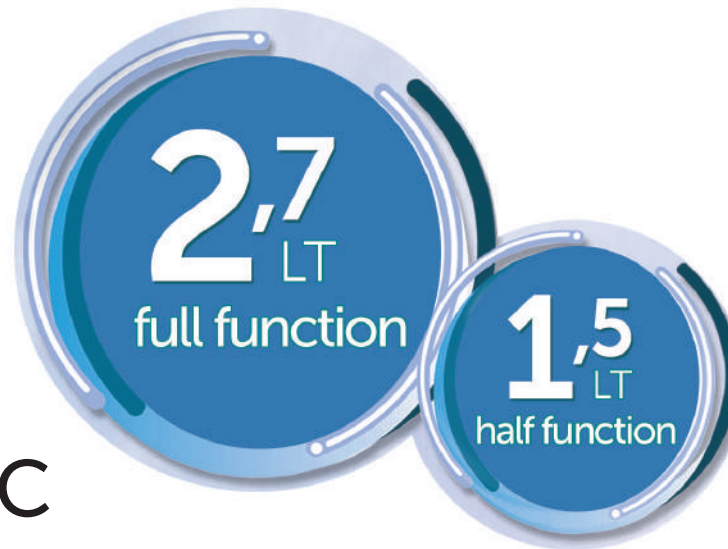

ISO 9001

Water-saving WC

Protect both nature and your budget
with water-saving WCs!

Water-saving WCs, which spend only 2,7 lt water for full function, are the result of intense working of Ece Banyo R&D department. This amount is much less compared to old generation WCs which consume 6 to 9 lt water. When the WCs are used with dual flush mechanism**, only 1,5 lt water is consumed for half function which means 61.000 lt* water saving in average per year for a family with 4 people. This figure increases when social areas such as workplaces, shopping malls and sport centers are added.

Function tests, that are done by **Ece Banyo**, are approved by TSE laboratories.

*This calculation is made according to consumption quantity of a family with 4 people that uses close coupled WC with 9 lt consumption in full function. This number changes between 7.000-61.000 lt depending on the Flush Mechanism and WC type.

**For this function, cistern water level is needed to be arranged to minimum level with suitable cistern system.

rimLess Inner Surface

rimLess WC

Hygiene & Easy Cleaning

Specially designed for the ones who look for easy cleaning and extra hygiene

Riga rimLess wallhung WC prevents bacteria formation compared to traditional WCs by removing the rim on the inner surface that provides easy cleaning.
